Inauguration of the Main Hall of the Eurasia Reiyukai 16th Branch

The Main Hall of the Eurasia Reiyukai 16th Branch was graciously inaugurated by the Founder President of Eurasia Reiyukai on 31st January 2015 in a large gathering at Sanepa Lalitpur. Muma Mrs. Hiroko Masunaga also graced the occasion with her august presence.

A gist of the guidance of the Founder President in the gathering is mentioned below.

We have to know about the wonder of the relationship of our karma, the reason for us to be born as human beings. Why have we been born? Undoubtedly, we have our duties and responsibilities. We should feel ourselves grateful and proud to be born as a human being at this present world which is facing various problems. There was a necessity to be born at this present time so we have arrived. It is absolutely essential on our part to fulfil our duties and responsibilities as a human being. Only human can utter words like Thank you or forgive me and can smile. To avail of the opportunity to become Michibiki means to create an empathetic person from the presently living people by awakening the spirit of Bodhisattavas within their mind & soul. There should be a deep relationship between people & they should acknowledge each other's existence and through harmonising should arrange gatherings. Human cannot live alone-we must establish world peace through Michibiki. We have got the opportunity to meet each other because of our karmic relationship. We should be grateful that we have received an opportunity to meet each other.

The doors of the mind of others can be opened with a simple smile. A change should be brought about in the mind in the manner of receiving. There must be self confidence in trying to achieve that power which has not been experienced yet. Let us make the beauty of the soul more beautiful. People should change according to their karma. One's own parents or ancestors have not been accidental acquaintances but have been a vehicle of life through karmic relationships with him/her. One has to avail of the opportunity by him/herself to make one's ancestors happy.

Talents & power hitherto unexplored should be brought out by intense efforts and by reforming into an active person, should plunge into work him/herself & make others also work, thus being capable of showing the results.

Meeting of the co-ordinators of Eurasia Reiyukai Social Development in India & Nepal organised.

The meeting of the co-ordinators of the Social Development Centres of India & Nepal were held at Eurasia Reiyukai Sanepa & Siliguri on the 5th of January & the 12th of January 2015 in the august presence of the Founder President respectively. In this meeting the co-ordinators had announced their annual reports conducted by the respective Social Development Centres and also pledged for future programmes and declare determination. The Founder President delivered Guidance in this meeting.

Celebration of the 66th Republic Day of India.

On the 26th of January, Monday, the Republic Day of India was celebrated by Eurasia Reiyukai amidst a large gathering. The programme started off with the flag hoisting ceremony at the premises of the Eurasia Reiyukai Head Quarters of Eurasia Reiyukai at Siliguri. All the Social Development Centers of India also celebrated this day at their respective centers.

Grand Gathering has been organised

The grand gathering of the Eurasia Reiyukai 21st Branch was organised on the 11th of January, 2015 at Siliguri, India. Similarly, grand gathering of Eurasia Reiyukai 18th Branch took place on 18th January 2015 at Kalimpong, India by emplacing Mihatas of their respective branch in the august presence of the Eurasia Reiyukai Founder President couple.

Commencement of Japanese Language Class

On the aegis of Eurasia Reiyukai **Masunaga Japanese Language** class has been commenced at Eurasia Reiyukai 18th Branch Main Hall, Kalimpong from 15th January 2015. An information is to be given to all the members of Eurasia Reiyukai as well as non-member citizens that people wishing to learn the Masunaga Japanese Language can enrol themselves for the above classes.

Global Warming (Climate Change)

What is Global Warming?

The earth we are inhabiting is gradually warming up. This is not due to an increased temperature of the Sun but rather due to human activities. Humankind has engaged itself in activities that pollute the environment it lives in. The gradual increase in the average world temperature and the effects it brings along with it is called global warming.

Industries, factories, extensive use of vehicles & machines have led to the use of fuels like petrol, diesel & kerosene and combustion of methane along with immense amounts of carbon, carbonmonoxide & coal have released immensely harmful gases in the environment that has led to global warming to alarming levels. The release of M2.5 by factories is even more dangerous. It is becoming impossible to breathe in this air too.

Heating of the atmosphere means that the temperature of the oceans & seas also rises. The soaring temperatures lead to the melting of the ice caps & increase in sea levels leading to a dangerous possibility of immersion of land areas.

Rains become irregular, areas where there is supposed to be snowfall become prone to only rains. Unlikely areas become infested with mosquitoes. Disappearance of glaciers, destruction of wildlife, food insecurity, desertification of arable land, occurrence of flood, landslide, storms & cyclones & long bouts of drought seems inevitable. Various kinds of infections, diseases & epidemics will take place & at any point of time a destruction of the planet might take place & can cease to exist. The Founder President of Eurasia Reiyukai Mr.Yushun Masunaga has told in his guidance about the duty to make this natural world even better and transfer a better future to our successors which we have received from our ancestors. According to that, let us unitedly work towards saving our planet.

An appeal from Eurasia Reiyukai.

1. Let us ourselves save our planet.
2. Let us not destroy our forests. Let us plant more trees.
3. Let us decrease the production of green house gases.
4. Let us spread awareness in the society about the bad effects of global warming.
5. Let us save our planet by resorting to activities that are conducive to the sustenance of the environment.
6. Let us not litter places with rubbish.
7. Non perishable rubbish can be separated and be recycled. Let us minimise the use of plastic.
8. Let us opt for organic manure in agriculture instead of chemical fertilises & pesticides.
9. Production of gases containing carbondioxide elements need to be reduced.
10. Let us not keep plugs in sockets unnecessary for long periods of time.
11. Let us replace old cars & opt for walks, as far as possible, to avoid travel by cars.
12. Let us opt for CFL for lighting purposes.
13. Let us minimise the use of electricity, cooking gas & oil per household for 2 weeks every month.
14. Let us properly switch off electrical appliances after use.
